

PHOENIX PARK
GAS PROCESSORS LIMITED

PPGPL WINS 17th SAFETY AWARD

Phoenix Park Gas Processors Limited has placed first in the Gas Processors Association (GPA) Midstream Division II - International Category for safety in 2018.

It is no accident that PPGPL continues to lead in the area of industrial safety. Why?

PPGPL has nurtured a strong safety culture, which is driven by its people. Safety remains a core value and is practiced, monitored and championed by everyone.

This award, presented to PPGPL for yet another year is an honour for all PPGPL employees and contractors, whose eternal vigilance has ensured our safety of operations, a cornerstone of our success.

The GPA Midstream Safety Awards Program recognizes GPA Midstream member companies for outstanding safety performance. US-based and non-US midstream operating companies compete and are recognized separately for the safety honours.

Division II represents companies with 200,000 - 999,999 midstream operational workhours. The award is based on the total cases incidence rate, lowest fatalities plus lost workdays incidence rate and highest number of workhours reported.
