

PHOENIX PARK
GAS PROCESSORS LIMITED

Growing Beyond

Celebrating 32 Years of Production: June 1991-June 2023

Since first production, we have grown steadily to meet the local demand for processed natural gas. Today, we are growing beyond local shores, having acquired three North American assets in the last two years.

Our pioneering spirit is fueled by our leadership and human capacity. As the first state-controlled company to expand its footprint into North America, we are on track to realizing our vision, *"To be a recognised global leader in the development of sustainable energy-related business."*

As we break new ground expanding along the value chain internationally and regionally, we applaud our employees, contractors, and business associates for their continued contribution to our success.

Through our expansion, we are proudly contributing to the long-term economic growth and development of Trinidad and Tobago.
